

Universal Swim Platform Cover Installation Instructions

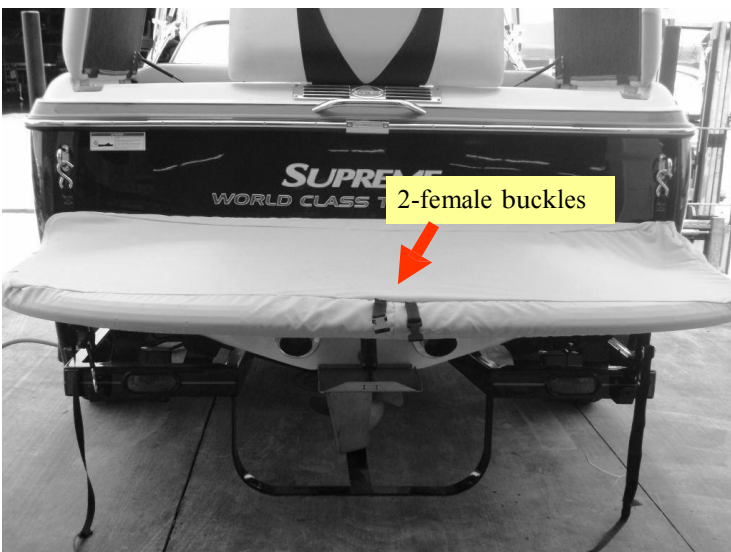

1. Place the cover over the swim platform with the two female buckles facing outward. Be sure that the shock cord in the hem of the cover is completely around the perimeter of the swim platform. Allow the 5-foot straps to hang freely downward.

2. Adjust the cover by gently pulling aft so that the female buckles hang freely downward.

3. Guide the 5-foot straps under the swim platform and connect the male end of the buckle to the female end of buckle. Tighten the straps by pulling the loose end until the strap is taut and the cover is securely on the platform.

Note: The side of the cover next to the boat will pull down only as far as the platform supports will allow.

CAUTION

This cover is recommended for mooring and storage only.
